Cabinet de dermatologie Es-Senia

# Triage support report — skin lesion

dermIA v2.0.0 · model ham10000-bcn20000-m5-v3 v3.0.0 (full profile)

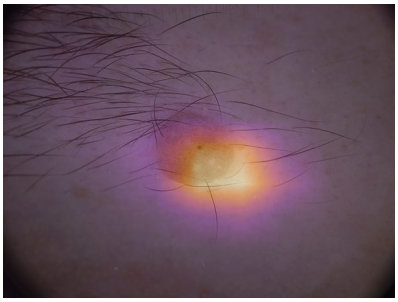

| | | | |
|---|---|---|---|
| Patient | P-2026-0423 | Analysis date | 02/11/2026, 11:31 |
| Age | 40 years | Requested by | Dr Karim Haddad |
| Sex | male | Body site | face |
| Tracked lesion | #1 — tempe gauche | Decision thresholds | original |

**REFER TO A PHYSICIAN**

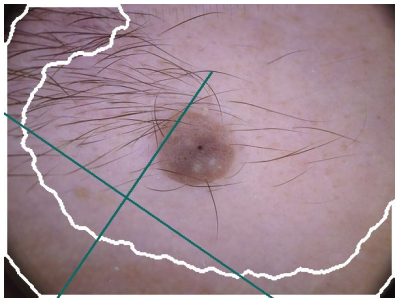

**Uncertain result: the AI abstains**
Several diagnoses remain plausible at the guaranteed confidence level. The case must be examined by a physician.

Analysed image

Most influential regions (Grad-CAM, “Benign keratosis”)

Outline and axes used for ABCD

## Estimated probabilities

| Diagnosis | Probability | In the guaranteed set* |
|---|---|---|
| Benign keratosis | 67.3% | yes |
| Melanocytic nevus | 17.8% | |
| Basal cell carcinoma | 5.3% | |
| Vascular lesion | 4.1% | |
| Actinic keratosis / Bowen's disease | 2.6% | yes |
| Melanoma | 2.3% | |
| Dermatofibroma | 0.6% | |

* Conformal set (Mondrian, alpha = 0.10): contains the true diagnosis with a probability of at least 90% for each class, assuming the cases resemble the calibration data. Melanoma decision if p(mel) ≥ 0.03 (cost ratio R = 10).
Original model thresholds, calibrated on its calibration set.

## Automatic ABCD criteria (indicative)

| Criterion | Measure | Detail |
|---|---|---|
| A — Asymmetry | 2/2 | asymmetric principal axes (shape or colours) |
| B — Border | 0/8 | sectors with an abrupt edge |
| C — Colours | 3/6 | dark brown, blue-grey, black |
| D — Diameter | 17.6 mm | more than 6 mm |

Caution: The lesion touches the image border: A, B and D are less reliable.
Indicative automatic measurements: on the HAM10000 test set, each separates melanoma from nevus only modestly (AUC 0.66 to 0.73). They do not replace dermoscopic examination.

## Change since the analysis of 07/06/2026 (147 days)

- More severe triage: from “PROBABLY BENIGN” to “REFER TO A PHYSICIAN”.
- New colour(s): black.
- Diameter increased: from 9.7 mm to 17.6 mm.

Also compare the images visually: framing and magnification may differ between examinations.

## Medical review

Not yet reviewed by a physician.
